

THE ADDIS CLINIC

ANNUAL REPORT 2021

Driving change.

For more than a decade, The Addis Clinic has provided high-quality healthcare in some of the world's most challenging settings.

It was another difficult year in global health. Even as the United States rolled out its first vaccinations and even boosters for much of the population, the developing world lagged far behind in gaining access to lifesaving medicine. In the first year of the pandemic, there were anomalies among African countries experiencing fewer infections and less severe consequences. Many experts pointed to the continent's isolation from North America and Europe, the younger population, or possible other genetic reasons for higher resistance to earlier strains of the virus. But in 2021, all of that changed. Our own staff were among the first in their country to receive the vaccine. Yet still they, and many members of their families, fell ill, were hospitalized, or unfortunately passed away.

Our work in 2022 will be to honor the sacrifices of health workers around the world. They put their lives on the line for the health of their communities, their nations, and our world. It is not an anomaly that their lives will continue to be changed by the various mutations of this virus, the emergence of new diseases, regional instability, and a lack of access to the infrastructure, resources, and capital enjoyed by other countries. We will support our colleagues in Kenya, Ethiopia, and Somalia by providing tools, education, and resources. Thank you for your help to hold the line in Africa and to keep our health workers safer.

Wade Munday
Executive Director

Global impact.

We believe everyone, everywhere, deserves access to high-quality healthcare. This principle defines us as a leader in nonprofit telemedicine application.

The Addis Clinic celebrated ten years of activity in a much different way than expected. We never imagined that we would be unable to celebrate in person, but we also never imagined the extraordinary difference we could make as a community of doctors, researchers, and activists. In ten years, we have delivered thousands of lifesaving diagnoses and treatment plans. We've also educated and mentored thousands of health workers in more than twenty countries. In the last year alone, we became an official NGO in Kenya and partnered with the U.S. Embassy in Nairobi, Kenya on an ongoing public health campaign. We are looking towards a bright future that incorporates providing high-quality healthcare mentorship, delivering continuing medical education, and discovering new insights into the use of telemedicine.

Our staff has grown and we are following our strategic plan to expand our activities into other remote parts of East Africa. What has not changed in ten years, and what will never change at The Addis Clinic, is the core tenet that everyone, everywhere deserves access to high-quality health care. We are only just beginning: to change the face of global health, to reach new heights in the use of digital health tools, and to study the evidence that leads to life saving medicine for our world.

Stephen Y. Chan,
MD, PhD

Promoting equity and sustainability in all of our impact areas.

Driving digital health innovation.

Delivering clinical expertise and digital health tools to remote parts of the world.

Supporting evidence-based research into the efficacy of telemedicine in global health.

Providing continuing medical education for health workers to promote health equity.

Empowering local leaders to impact change in their communities.

Delivering sustainable change by using local revenue and grant projects.

"When my newborn stopped eating and began losing weight, I knew I couldn't afford to see a specialist in Nairobi. Thanks to The Addis Clinic, a clinical officer in my community was able to conduct a visit, submit a consultation, and had a diagnosis the next day. Now my baby is healthy again."

— Female, 19, Kisumu, Kenya

EMPOWERING COMMUNITIES

125

Hospitals supported by staff using The Addis Clinic's telemedicine software

3,525

Medical consultations completed between local health workers and Addis Clinic physicians

SUPPORTING PROVIDERS

202

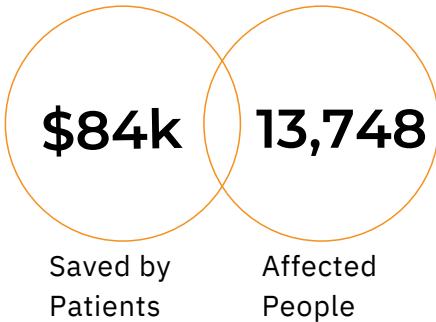

Monthly users submitting consultations to The Addis Clinic

95

Active members of The Addis Clinic's Volunteer Medical Corps

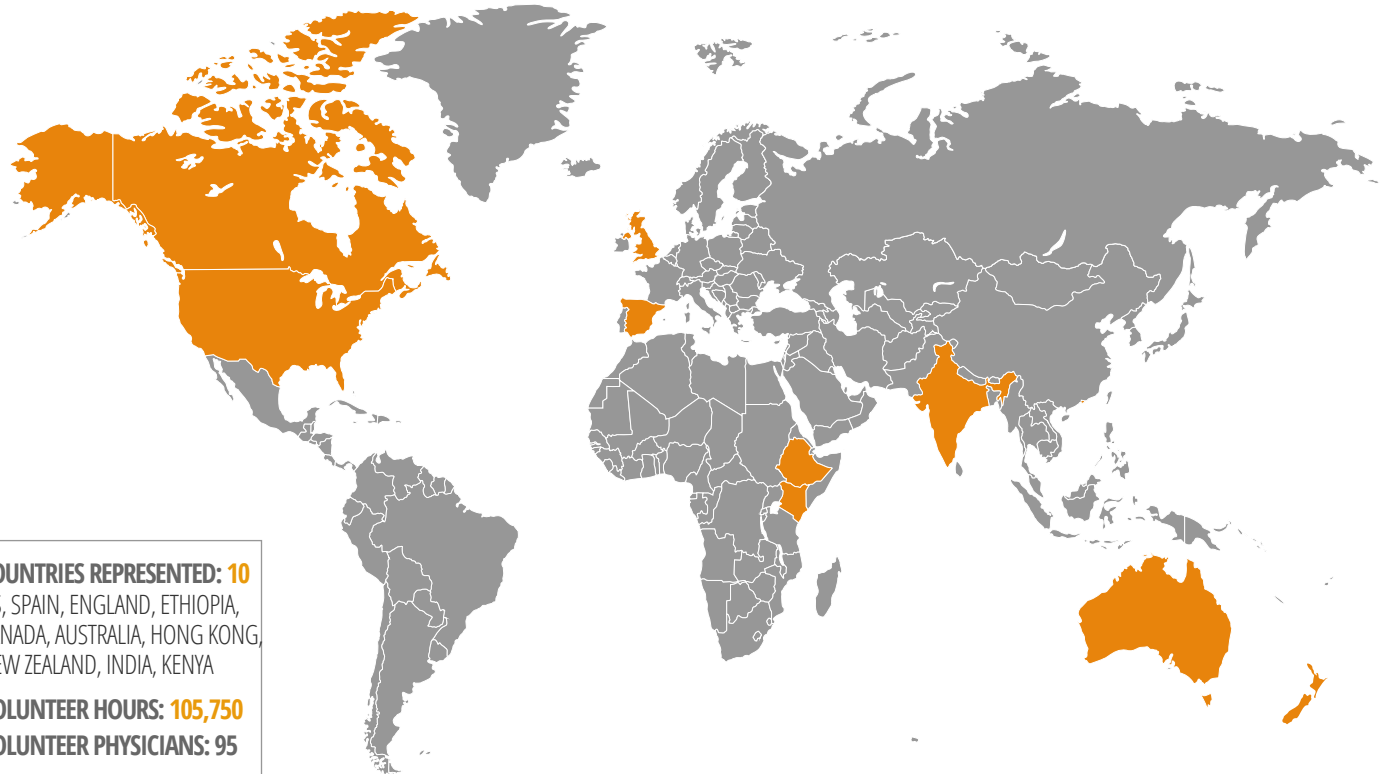

"After treating more than 60 patients through The Addis Clinic's telemedicine software, **I feel more confident in my medical skills and can provide a higher level of care to my patients.** Thanks to The Addis Clinic, my patients can save money and also receive high-quality care without traveling to a major medical facility."

— Billy Osango, Senior Clinical Officer

A map of Kenya showing its county boundaries. 125 counties are highlighted in orange, representing the locations where the service is provided. A callout box points to these highlighted areas.

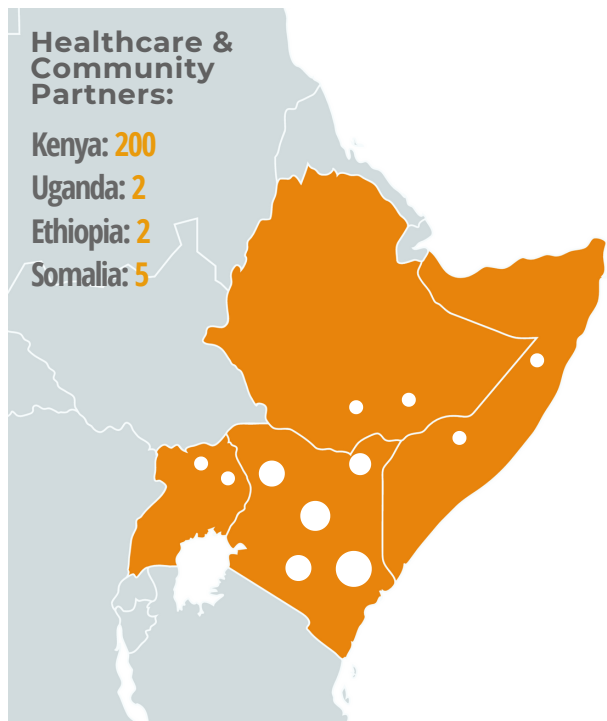

KENYA LOCATIONS:
125
PATIENTS COVERED:
1.5 MILLION

COUNTRIES REPRESENTED: 10
US, SPAIN, ENGLAND, ETHIOPIA,
CANADA, AUSTRALIA, HONG KONG,
NEW ZEALAND, INDIA, KENYA

VOLUNTEER HOURS: 105,750
VOLUNTEER PHYSICIANS: 95

On average, our Volunteer Medical Corps responded in less than 48 hours to requests for medical advice from other providers in our service areas.

SUPPORTING OUR WORK

THE ACADEMY

The Academy benefits beleaguered healthcare workers in East Africa with resources, tools, and money deposited to their mobile wallets. These are public donations that are made on a recurring monthly basis and 100% supports hundreds of health workers and their more than 1M patients.

THE FOUNDER'S CIRCLE

The Founder's Circle provides us with operating funds for our staff and allows all public contributions to go directly towards healthcare activities. These humanitarian leaders include innovators in medicine, science, business, and members of our Board of Directors.

VOLUNTEER MEDICAL CORPS

Members of the Volunteer Medical Corps are an international group of medical professionals who are committed to health equity. They contribute an average of 125 hours per month to timely diagnostic and treatment advice through telemedicine.

Our Board of Directors has over **80 years** of experience in delivering high-quality healthcare.

Turning experience into innovation.
